Continuation of 11. does NOT place the application in condition for allowance because:

The applicant's arguments made in the After Final amendment filed on 28-March-2005 have been fully considered but are not deemed persuasive:

In response to the applicant's arguments regarding "concepts of 'each node has one and only one parent node' and 'determining if a node is present in only one tree' do not correlate to each other, are unrelated, and are not mutually exclusive whereas a node may have one and only one parent node, but not be present in only one tree", the arguments have been fully considered but are not deemed persuasive because Riddle teaches, "for each node represented by a data slot there can be one and only one node number appearing in the respective data slot identifying the parent node" (see column 8, lines 23-30.) In addition, Riddle teaches, "Note that the second appearance of node 8 in the routing graph prevents the routing graph from being a tree in which only a single parent node is permitted" (see figure 9, and see column 9, lines 12-15) which is also indicative that "a node is present in only one tree".
